

# CONVERGE CONTROL

For touchless control of any connected in-store experiences

Give customers touchless control of any connected in-store display

### Remote Control

The customer navigates the experience directly from their phone.

### Easily deployed

Works for new and existing connected installations without any additional hardware to be installed.

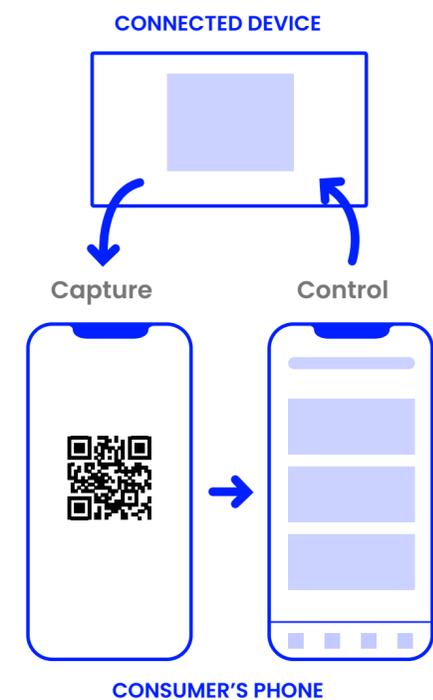

### Easy to use

No app to download or WiFi to connect to for a seamless customer experience.

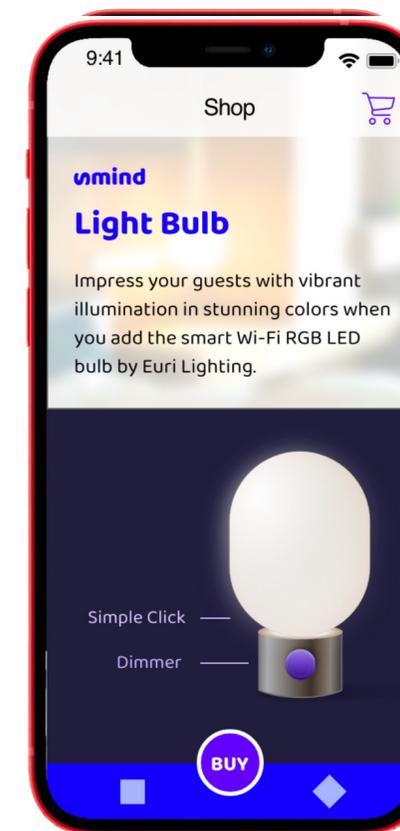

# HOW IT WORKS

- 1 The customer captures a Converge Control QR code with their phone  
They get contact-free control of any in-store experience.
- 2 The customer interacts with your product using their phone  
Custom content plays seamlessly from your connected device or screen.

- 3 The customer takes content and experience home  
To purchase later, get more information, receive updates, and more.

- 4 All interactions are captured by the Converge Platform  
Measure interest levels and dwell time to drive key business decisions about assortment and promotions.
